DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 41, 96 and 152 have been considered but are moot in view of the new ground(s) of rejection.

The Examiner notes that the amendments have introduced a 112 1st Paragraph rejection (**see below**). The Examiner has further provided a possible amendment to clarify the amendments and place the claims in condition for allowance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 41, 96 and 152 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 41, 96 and 152 have been amended to recite, "wherein the real-time action comprises an action selected from the group consisting of authorizing the viewing of the particular television program, wherein the program is a pay-per-view program, and displaying a program reminder for the particular program" and "prefetch current

Art Unit: 2421

program guide data from the continuous data stream when the real-time action is performed".

The Examiner notes that prefetching program guide data in response to a reminder (**real-time action**) on Page 42, Lines 5-10. However, in support of prefetching program guide data in response to the authorization of a pay-per-view program (**real-time action**), Page 46, Lines 28-32 only state that the prefetching of the program guide data is triggered in response to display of a window or banner asking the user to tune to the pay-per-view channel, and is silent in teaching that program guide data is prefetched in response to a pay-per-view viewing authorization.

The Examiner recommends amending the claim to recite, "wherein the real-time action comprises an action selected from the group consisting of displaying a banner or window corresponding to the particular television program, wherein the particular television program is a pay-per-view program, and displaying a program reminder for the particular program".

Allowable Subject Matter

Claims 46-48, 52-53, 101-103, 106-108, 157-159 and 163-164 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
